

PRESS RELEASE

## THE HIGH ROLLER – THE WOOD-FIRED OVEN REVOLUTION IS HERE

Villeneuve, February 10, 2025

### **Bold design, warmth that lasts – the new generation wood-fired oven.**

What if the wood-fired oven was no longer just a rustic object, but a real statement design? Ephrem hits hard with Le Flambeur, a mass-produced wood-fired oven that combines thermal performance, ultra-modern aesthetics and easy assembly. Gone are the classic dome ovens, welcome to a new vision of fire.

### **🔥 DISPOSABLE ANTI-OVEN: WHEN DESIGN MEETS SUSTAINABILITY**

With the rise of stainless steel pizza ovens, light but ephemeral, Ephrem is taking the opposite approach and reinventing the experience of fire.

Why will Le Flambeur change everything?

- ✓ **Incomparable thermal inertia:** stores and releases heat for hours.
- ✓ **Total versatility:** searing, roasting, simmering, baking bread... everything is possible.
- ✓ **Unique design:** rounded corners, neo-industrial inspiration, a strong visual signature.
- ✓ **A real wood-fired oven:** a fireplace made of volcanic concrete, insulated and reinforced
- ✓ **Easy to install:** an express assembly in 1 day, without masonry.
- ✓ **100% natural materials & made in France** – because good taste starts with solidity.

### **🔥 AN EXPERIENCE THAT WILL REKINDLE THE FLAMME IN THE KITCHEN**

Le Flambeur is not just an oven, it is a field of culinary expression. Imagine...

- A fiery dinner with friends, crispy pizzas in 90 seconds.
- Perfect sourdough bread, thanks to a heat that stays stable all night long.
- A piece of melt-in-the-mouth meat, softly candied in the residual heat
- Highlights to be experienced together around the warmth and aesthetics of the Flambeur
