

TwoECO Transforms the Flooring Industry with Innovative and Eco-Friendly Tiles

TwoECO, a pioneer in sustainable innovation, proudly unveils its latest collection of bi-component outdoor tiles, crafted from post-consumer recycled plastic and **FSC™**-certified wood residues. In collaboration with **Tetra Pak**, the company continues to promote a circular economy model, reducing environmental impact while upholding the highest standards of quality, durability, and design.

Through a **100% recycling process**, TwoECO seamlessly integrates the strength of post-consumer plastic with the natural warmth of **regenerated FSC™-certified wood**, creating a virtuous cycle that turns waste into a valuable resource.

Sustainable Innovation with Uncompromising Performance

Designed to combine longevity, practicality, and effortless installation, **TwoECO** tiles offer a sustainable and versatile flooring solution.

Available in a wide range of colours, they blend seamlessly into diverse environments, from residential spaces to commercial and public settings. Whether enhancing verandas, gardens, or terraces, or serving as the ideal flooring for gazebos, garden sheds, and storage areas, **their superior resistance** makes them perfectly **suited** for driveways, parking spaces, and high-load areas.

*"Our mission is to merge design with sustainability, creating solutions that are both aesthetically pleasing and environmentally responsible. Thanks to an exclusive production process developed by TwoECO, we have successfully overcome the challenges of combining materials with distinct transformation properties. This innovation allows us to breathe new life into recycled materials, significantly reducing waste while contributing to the development of more sustainable living spaces. What's more, TwoECO material is fully reusable—**indefinitely.**"*

— **Ezio Rudelli**, Product Development Manager at TwoECO

A Commitment to a Greener Tomorrow

TwoECO's dedication to sustainability is reflected in a product Line that not only delivers outstanding performance but also encourages a shift toward more eco-conscious choices. By responding to the growing demand for sustainable solutions, TwoECO is paving the way for a greener, more responsible future.

"Every step taken toward protecting our planet, no matter how small, is a step toward a better future for all."
